

FoodHub Website UI Redesign - Project Report

Project Overview

This project redesigns an existing food delivery website to improve usability, visual hierarchy, consistency, and responsiveness.

Objectives

Perform heuristic evaluation, create a mood board and style guide, design high-fidelity desktop and mobile mockups, and build responsive layouts.

Tools Used

Figma, GitHub

Design Process

1. Evaluated the existing website.
2. Identified usability issues.
3. Created a mood board and style guide.
4. Designed desktop and mobile mockups.
5. Prepared responsive layouts and prototype.

Expected Outcome

A modern, accessible, visually appealing, and user-friendly interface.

Conclusion

The redesign improves navigation, consistency, accessibility, and overall user experience while maintaining the core functionality of the website.
